

## Claims

- [c1]        c hazardous material detector comprising:  
             an envelope comprising a front side and a back side;  
             holes formed in at least one of the front side or the back side of the envelope;  
             a hazardous material test strip for detecting the presence of hazardous material  
             in contact with the test strip;  
             whereby when hazardous materials are detected by the hazardous material test  
             strip a physical change occurs to the hazardous material test strip and the  
             physical change can be viewed through at least one hole formed in the at least  
             one of the front side or the back side of the envelope.
- [c2]        2he hazardous material detector as claimed in claim 1 wherein the hazardous  
             material test strip is mounted on a holder.
- [c3]        3he hazardous material detector as claimed in claim 2 wherein the holder and  
             hazardous material test strip mounted thereon are smaller than the envelope  
             and whereby the holder move while positioned inside the envelope.
- [c4]        4he hazardous material detector as claimed in claim 1 wherein the hazardous  
             material test strip is mounted on a holder and contained in a carrier.
- [c5]        5he hazardous material detector as claimed in claim 4 wherein holes are formed  
             in the carrier.
- [c6]        6he hazardous material detector as claimed in claim 1 wherein the hazardous  
             material test strip is positioned adjacent to the front side of the envelope.
- [c7]        The hazardous material detector as claimed in claim 1 wherein the hazardous  
             material test strip is positioned adjacent to the back side of the envelope.
